<b>Declaration</b>	<b>3</b>
<b>Abstract</b>	<b>7</b>
<b>List of Tables</b>	<b>13</b>
<b>List of Figures</b>	<b>17</b>
<b>1 Introduction</b>	<b>29</b>
<b>2 Accelerator Physics</b>	<b>33</b>
2.1 Introduction . . . . .	33
2.2 Transverse dynamics . . . . .	34
2.2.1 Transfer Matrix notation . . . . .	39
2.3 Longitudinal dynamics and stability . . . . .	41
2.4 Dispersion and its effect on trajectories . . . . .	45
<b>3 Crystal Channeling Physics</b>	<b>49</b>
3.1 Introduction . . . . .	49
3.2 Planar Channeling . . . . .	50
3.2.1 Straight crystals . . . . .	51
3.2.2 Bent crystals . . . . .	56
3.3 Dechanneling and Volume Capture . . . . .	59
3.4 Volume reflection . . . . .	62
<b>4 Beam Collimation</b>	<b>65</b>
4.1 Roles and challenges of a collimation system in large hadron colliders . . . . .	65

4.1.1	Continuous beam loss . . . . .	66
4.1.2	Accidental beam loss . . . . .	68
4.2	Present collimation system in the LHC . . . . .	69
4.2.1	Performance . . . . .	73
4.2.2	Main limitations . . . . .	75
4.2.3	Baseline for the HL-LHC upgrade . . . . .	77
4.3	Crystal collimation . . . . .	79
4.3.1	Main improvements . . . . .	79
4.3.2	Main challenges . . . . .	81
<b>5</b>	<b>Simulation tools</b>	<b>85</b>
5.1	Simulation challenges for predictions of cleaning performance . . . . .	85
5.2	Collimation tools . . . . .	87
5.2.1	The scattering routine . . . . .	89
5.2.2	The beam loss pattern . . . . .	90
5.3	Crystal routine for collimation studies . . . . .	92
5.3.1	Coherent interactions . . . . .	94
5.3.2	Scattering routine . . . . .	100
<b>6</b>	<b>Comparison with single-passage experiments</b>	<b>105</b>
6.1	Beam line . . . . .	106
6.2	Experimental apparatus . . . . .	108
6.3	Single-pass measurements . . . . .	111
6.3.1	Qualitative comparison . . . . .	114
6.3.2	Channeling efficiency . . . . .	117
6.3.3	Dechanneling length . . . . .	118
6.3.4	Volume reflection . . . . .	120
6.3.5	Transition regions . . . . .	121
6.3.6	Low bending crystals . . . . .	124
6.3.7	Nuclear interaction rate . . . . .	126
6.4	Extrapolations to LHC energy . . . . .	128
6.5	Limitations of the crystal routine . . . . .	129

<b>7</b>	<b>Comparison with multi-passage experiments</b>	<b>133</b>
7.1	Experimental Apparatus . . . . .	134
7.2	Machine conditions . . . . .	137
7.3	Multi-pass measurements . . . . .	139
7.3.1	Size of extracted beam spot . . . . .	140
7.3.2	SPS beam loss pattern . . . . .	144
7.3.3	Angular scans . . . . .	150
7.4	Physics interpretation of SPS results . . . . .	158
7.4.1	Main outcomes . . . . .	171
<b>8</b>	<b>Design of a prototype crystal collimation system for LHC</b>	<b>173</b>
8.1	Motivations and design goals . . . . .	173
8.2	Design constraints . . . . .	175
8.3	Final layout and configurations . . . . .	176
8.3.1	Vertical Plane . . . . .	178
8.3.2	Horizontal Plane . . . . .	179
8.4	Semi-analytical layout studies . . . . .	181
8.5	Optimisation of crystal parameters . . . . .	186
8.6	Hardware installed in the LHC . . . . .	190
8.7	Expected performance for nominal LHC parameters . . . . .	193
8.7.1	Simulation setup . . . . .	193
8.7.2	Simulation results at 7 TeV . . . . .	194
8.7.3	Absorption of channeled halo particles . . . . .	199
8.7.4	Simulation results at 450 GeV . . . . .	200
8.8	Expected performance during first tests at 6.5 TeV . . . . .	203
<b>9</b>	<b>Conclusions</b>	<b>209</b>
	<b>Bibliography</b>	<b>213</b>
<b>A</b>	<b>General solution of the equation of motion</b>	<b>225</b>
<b>B</b>	<b>Ionisation energy loss</b>	<b>229</b>
<b>C</b>	<b>Alternative locations for crystals installation</b>	<b>235</b>
