

# Contents

## Chapter I

Determination of Crack Width for RC Beams in Flexure .....	9
<i>Maria WŁODARCZYK, Marta LUTOMIRSKA, Duyen TRINH DUC</i>	

## Chapter II

Buckling Resistance of Short Perforated Thin-Walled Bars – FEM Analysis and Experimental Results .....	21
<i>Andrzej PIOTROWSKI, Marcin GAJEWSKI</i>	

## Chapter III

Estimation of the Thin-Walled Beam Theory Predictions in Relation to Finite Element Shell Solutions .....	33
<i>Cezary AJDUKIEWICZ, Marcin GAJEWSKI</i>	

## Chapter IV

Reinforced Column-Supported Embankments: An Approximation Method for Evaluating LTP Reinforcement .....	55
<i>Beata GAJEWSKA, Marcin GAJEWSKI</i>	

## Chapter V

Smoothed Podgórski and Ottosen Limit State Criteria .....	75
<i>Aleksander SZWED, Inez KAMIŃSKA</i>	

## Chapter VI

Yield Criteria for Concrete Built of Deviatoric and Meridional Shape Functions .....	85
<i>Aleksander SZWED, Inez KAMIŃSKA</i>	

## **Chapter VII**

Dissipation Function and Elastoplastic Constitutive Relationships Based on Smooth Drucker-Prager Yield Condition .....	95
<i>Aleksander SZWED</i>	

## **Chapter VIII**

Examples of Elastoplastic Damage Models Obtained from Energy and Dissipation Potentials .....	107
<i>Inez KAMIŃSKA, Aleksander SZWED</i>	

## **Chapter IX**

Stability of a Square Sheet of Rubber-Like Material under Symmetric Biaxial Loading ...	125
<i>Stanisław JEMIOŁO</i>	

## **Chapter X**

A Note on the Implementation of the Hyperelastic Kilian Model in the Abaqus .....	135
<i>Aleksander FRANUS</i>	

## **Chapter XI**

Scope of Application of the Murnaghan Hyperelastic Model for Elastomers .....	145
<i>Stanisław JEMIOŁO, Aleksander FRANUS, Włodzimierz DOMAŃSKI</i>
